02 KENWOOD SUBWOOFER 250W.

The Kenwood subwoofer 250W fits discretely under the passenger seat greatly enhancing your listening experience and is designed to work with either the factory radio or Kenwood Multimedia upgrade. Made from die cast aluminium, this allows for a more solid enclosure to help give more improved bass. It is a well-constructed design and has reasonable weight for the size, boasting a massive 8" subwoofer to give a greater output than most for its size. The use of D-Class amplification allows greater power in smaller space so the Kenwood has a maximum output of 250W. It has a wired remote control which allows you to adjust the subwoofer while listening.
